Summary	
Description	Precondition: The user wants to be notified about being an older version of API documentation and there should also be a link to the latest version of documentation. Steps: 1)Open site https://vuejs.org/. 2)Go to the mouse over "Learn" in the navigation bar and click on the clutch with API. 3)There will be a transition to the page with the API. 4)Select in lower left corner of the documentation version 0.11. Result: Notice and link missing. Expectation: There is a link and notification.
Priority	Medium
